EXPERIENCE

Play & Win — Freelance Flutter Developer *2026 | 100+ Google Play installs*

Google Play

- Designed and developed a production-ready Flutter arcade game platform from scratch, featuring full Arabic localization and a Firebase backend.
- Built a scalable BLoC (Cubit) architecture supporting 6 mini-games, including a Flame-powered racing game, with Online, Local, and AI game modes.
- Implemented Firebase Auth, Firestore, Cloud Functions, FCM notifications, an admin dashboard, weekly leaderboards, referral rewards, anti-cheat systems, and LevelPlay mediation for ad monetization.

Remember — Independent Flutter Developer *2026 | 100+ Google Play installs*

Web | Windows | Google Play

- Developed a cross-platform productivity and personal finance application with a clean, feature-based architecture.
- Implemented state management using Flutter BLoC (Cubit) with global navigation, search, and responsive UI.
- Built a local-first data layer using Drift (SQLite), supporting migrations, PDF/CSV export, and Arabic/English localization.

Projects

Qareeb App - **GitHub** - Google Play - App Store

- All-in-one Islamic app including Quran, Hadith, Radio, Prayer Times, and Tasbeeh.
- Integrated REST APIs for real-time prayer times and radio streaming.
- Provider-based state management.
- SharedPreferences for local data storage.

News App - **GitHub**

- Real-time news from REST API with pagination.
- MVVM architecture using Bloc/Cubit.
- Category browsing and keyword search.
- Article view with source link and offline cache.

Evently App - **GitHub**

- Real-time event management using Firebase Firestore.
- Authentication system with Arabic/English localization.
- Dark/Light mode with event filtering and favorites.
- Google Maps integration for event location selection.

Space App - **GitHub**

- Integrated 3D planet models (model viewer plus) with smooth UI flow.
- Used PageView and screen-to-screen data passing.

SKILLS

- **Mobile Dev:** Flutter & Dart
- **State Management:** BLoC, Cubit, Provider
- **Architecture:** MVVM, OOP, Clean Code
- **Backend & Data:** Firebase , REST APIs, JSON
- **AI & Productivity:** **Google Antigravity**, **Cursor**, Claude, Gemini, ChatGPT
- **Design & UI:** Figma, Responsive UI, Custom Animations
- **Tools & Workflow:** Git, GitHub, Debugging, Problem Solving

CERTIFICATIONS

- **Flutter Diploma (6 months)** – Route IT Training Center *(Jun–Dec 2025)*
- **Flutter Summer Training (145 Hours)** – ITI (Jul. 2025)
- **Mastering OOP (C++)** – Mahara-Tech (2025)
- **C Programming** – Mahara-Tech (2025)
- **HTML & CSS** – Mahara-Tech (2025)
- **UI/UX Design with Figma** (2024)
- **Photoshop & Illustrator Basics** (2024)

Languages

- **Arabic** — Native
- **English** — Intermediate

EDUCATION

- B.Sc. in Computer Science — Zagazig University
- **Expected Graduation:** July 2027
- Zagazig, Egypt
